To whomsoever it may concern

Shri Aaditya Rengarajan, worked under me over a course of 8 weeks in Cyber-Threat Intelligence and Information Sharing and Analysis during 2024 in the Security Operations Centre. In this capacity, I was able to closely observe and assess his technical as well as soft skills.

During his internship at National Remote Sensing Centre-Hyderabad, Aaditya demonstrated high learning ability and active interest in the project he worked on. His commitment and dedication were evident throughout his tenure, as he consistently met and exceeded his learning objectives and productivity-goals.

Aaditya was always well-prepared for each day's tasks, thoroughly researching and understanding the cyber-threat landscape and latest technologies and the specific challenges faced. His analytical and problem-solving skills were particularly noteworthy. For instance, he identified potential indicators of compromise in log files and was able to come up with solutions to enhance security and efficiency. His proactive approach and critical thinking skills greatly contributed to the success of our project.

In addition to his technical expertise, Aaditya exhibited excellent teamwork and communication skills. He collaborated effectively with the other team members, sharing insights and providing constructive feedback. Aaditya's interpersonal skills allowed him to build strong relationships with colleagues, which facilitated seamless collaboration and knowledge sharing. Based on his performance and contributions during his internship, I am confident that he has a bright future ahead in Cybersecurity.
